ON THE MANAGEMENT

For over 20 years, the management team of On The Record has been engaged in providing multimedia preparation and on-site presentation support for thousands of litigation matters. This positions OTR as one of the top service providers in the industry. We fully understand the demands an attorney puts on vendors during a high profile case, and we pride ourselves on meeting stringent deadlines in a timely and professional manner. OTR’s professionals are dedicated to providing the trial team with the highest level of personalized service during graphic evidence preparation and courtroom presentation. From discovery to verdict, On The Record can support the most demanding legal presentation needs.
ON THE TECHNOLOGY

OTR considers every level of presentation technology in addressing the communication objectives and budget parameters of its clients. Applied formats may range from conventional video playback to computer-controlled evidence retrieval systems.

Multimedia Presentation Technology
Advanced presentation technologies are a specialty area for On The Record. As far back as the first multimedia courtroom presentation system ever used in a courtroom trial proceeding (Alpo Pet Foods v. Ralston Purina) in 1988, the principals of On The Record have been providing litigators with unparalleled courtroom presentation support. Thousands of trials later, OTR remains committed to providing the highest level of trial presentation services. We work as a part of your trial team to integrate document images, photographs, graphics, video, animation and other exhibits into a clear and convincing courtroom presentation. The presentation technology allows for the instantaneous and random access of all exhibits and video deposition clips.

Additionally, the presenter can interactively magnify and highlight portions of documents or graphics directly on the courtroom monitors, enabling any jury to fully view and comprehend the evidence being presented. The effects: increased jury retention levels, efficient management of documents, impeachment of witnesses and the invaluable maintenance of important trial time, saving both time and money.

Customized Equipment Configurations
To insure a professional setup, OTR stocks a wide variety of top-of-the-line equipment to transform any venue into a modern electronic courtroom. We utilize only the most advanced technologies, including high resolution projection units, flat panel monitors, the latest in computer systems and other peripherals such as the ELMO Visual Presenter.

Using these presentation tools, we work with you, your trial team and courtroom personnel to design courtroom and war room systems that are customized specifically for the needs of your trial. In addition, our trial consultants coordinate the delivery and setup as well as the management of the technology. This frees the trial attorney to concentrate on what is important - the strategic issues of the case.

On-Site Technical Support and Training
OTR has provided professional trial support for thousands of successful trials nationwide. Our experienced trial consultants work with the trial team to help skillfully orchestrate the presentation of electronic evidence to the jury. From day one, we are part of your team. Our technical experts have years of experience working with trial lawyers, experts, witnesses and jury consultants to insure that all facets of a complex trial presentation are presented seamlessly to the trier-of-fact.

In addition to expert courtroom support, OTR provides twenty-four hour “on-call” support for your war room, including on-site video production, document imaging and graphic production, if desired. For the litigator who prefers to be more “hands-on”, OTR professionals will train members of your trial team and/or witnesses to operate the presentation system.
Video
The use of video in the modern courtroom has grown exponentially over the past few years. It is no longer uncommon for an out-of-state witness to testify via video. In the same vein, more and more attorneys are beginning to understand the powerful impact that video impeachment has in a courtroom. While it may be a convincing strategy to impeach a witness by reading the prior testimony, it is dramatically more effective to have the face of the witness (who is in the witness stand) appear on screens throughout the courtroom contradicting his/her own testimony. By synchronizing video depositions to their corresponding transcripts, OTR gives the trial attorney instant access to any portion of the video with just a click of the mouse. This innovative technology provides immediate playback of segmented video transcript portions, with or without scrolling text.

On The Record also provides full service support for all levels of legal video production. OTR will professionally film your deposition in any location. OTR will accurately edit deposition testimony for playback in court. OTR will convert video depositions to various formats for easy access in the courtroom and war room. OTR can also produce the highest quality day-in-life video for even the most demanding case. In summary, OTR will take care of all the video needs of the modern litigator, allowing you more time to focus on the strategy of your case.

Documents/Demonstrative Evidence
On The Record provides a variety of services that assist the modern attorney with electronic case organization. OTR provides the highest quality document imaging, both prior to and during trial. Our highly trained staff understands the importance of confidentiality and quality control. All images are scanned at high resolution and de-skewed prior to delivery.

In conjunction with scanning, OTR provides accurate coding for delivery into any legal document management database system. Also, if desired, OTR consultants can design customized databases to meet even the most specific requirements. Lastly, OTR experts have extensive experience with a wide variety of file formats and will gladly convert existing images to any desired format. A full array of litigation graphic services are also available, including conceptualization and design of illustrative exhibits, exhibit board production and 2D or 3D animation. OTR consultants will help you create clear and persuasive graphics that will give case themes and theories lasting impact. Persuasive demonstrative exhibits help simplify a case presentation, capture jurors attention, enhance witness testimony and aid the attorney in more effectively presenting a case to a judge or jury.

For questions concerning any of the aforementioned services, a list of personal references, or a free consultation, please call Ken Kotarski or Charles Dunkin at (310) 342-7170.
"Our experience in major litigation with On The Record has been extraordinary. In several cases, including one two-month trial, the courtroom technology - computerization of documents, graphics and videos, allowed the jury to fully understand our case - resulting in a favorable verdict. The jury thought that we gave a more organized presentation than Isuzu, and your work was a key part of that perception."

(Isuzu v. Consumers Union)
Joseph W. Cotchett, Esq. - Cotchett, Pitre & McCarthy

"It is hard to imagine going to trial without On The Record as part of my trial team. In fact, OTR has provided multimedia presentation expertise for my last eight trials, all of which have resulted in favorable verdicts. The technology used by OTR is cutting edge and reliable and their personnel is very knowledgeable and extremely well trained. They regularly provide valuable assistance to our trial team, often working through the night to insure that my presentation is the best that it can be. I would strongly recommend On The Record to other trial attorneys who are considering using technology in the courtroom."

William Price, Esq. - Partner - Quinn, Emanuel, Urquhart & Sullivan

"On The Record has consistently and diligently proven themselves to be an invaluable resource. In several instances, they have proven not only their technical expertise, but also a thorough understanding of our needs during trial. That type of foresight and experience is a tremendous asset to any trial team. I would highly recommend OTR to any litigation attorney."

Laurence Berman, Esq. - Weintraub Tobin

**ON THE MONEY**

On The Record is exclusively committed to rendering evidentiary multimedia preparation and presentation services. OTR also understands the need for cost-efficient presentation solutions, not technology overload. To that end, client service expectations are always met, deadlines never missed and budgets kept in line. The firm invites you to contact one of its representatives at any time during the course of your litigation, even on the eve of trial.
